

ARUN SANYASI

Instrumentation and Control Engineer | Operations Coordination | PLC/SCADA | Facility Automation

Samdrup Jongkhar, Bhutan | +975 17914131 | sanyasiarun220@gmail.com | Website: <https://arunsanyasi2786.github.io/arun-portfolio/>

CAREER OBJECTIVE

Seeking a growth-oriented engineering operations role where I can contribute through automation knowledge, maintenance coordination, technical documentation, team communication, safety awareness and service-focused problem solving for reliable facility and plant operations.

EDUCATION

B.E. Instrumentation and Control Engineering

College of Science and Technology, RUB 2022–2026

Result: 68.21% till 7th semester

Class XII, Karmaling Higher Secondary School 2020–2022

Result: 70.2%

Class X, BCSE 2019

Result: 78.14%

INDUSTRIAL EXPERIENCE

Bhutan Automation and Engineering Limited 12 Weeks

Graduate Engineer Trainee – Automation, SCADA and Commissioning

- Completed hydropower OJT covering SCADA integration, commissioning and HT/LT panel assembly.
- Developed inlet, outlet and flushing-gate logic with manual, automatic, remote and local modes.
- Worked with Siemens SICAM A8000 AI, DI, DO, AO modules and SCALA 250 signal mapping.
- Interpreted EPLAN schematics for signal tracing, ferruling, labelling and wiring verification.
- Assisted ACB/MCCB installation, internal wiring, busbar installation and final inspection support.

Druk Wang Alloys Limited Dec 2024–Jan 2025

Instrumentation and Electrical Automation Intern

- Gained exposure to switchyard, MCCs, motor-control wiring, protection systems and 33kV/11kV systems.
- Observed capacitor banks, preventive maintenance practices, field instruments and sensor-to-panel signal tracing.

Fuzzy Automation Jul 2025

Automation and Digitization App Intern

- Supported handwritten bills and receipts digitization workflow, testing, digital archiving and structured records.
- Assisted hotel CCTV connectivity, device checking and basic network troubleshooting for surveillance readiness.
- Supported equipment checks, task reporting and service-focused follow-up for reliable daily operations.

TECHNICAL AND OPERATIONS SKILLS

Facility Automation: HVAC control concept, sensors, alarms, monitoring, preventive maintenance records

PLC/SCADA: Siemens SICAM A8000, S7-1200, SCALA 250, TIA Portal, WinCC, Factory I/O, CODESYS

Electrical Systems: HT/LT panels, MCCs, ACB/MCCB, busbars, motor-control wiring, VFD wiring, 33kV/11kV exposure and networking

Design and Software: EPLAN Electric P8, AutoCAD Electrical, Proteus, Arduino IDE, Python, C, C++, MS Office

Operations Support: Task follow-up, reporting, safety checks, quality observation, documentation and record keeping

OPERATIONS AND LEADERSHIP READINESS

- Able to support day-to-day engineering operations through coordination, follow-up and clear reporting.
- Practical exposure to maintenance observation, safety practices, field checks and documentation control.
- Service-focused mindset for comfort, reliability, safety and smooth technical operations.
- Reliable team player with discipline, accountability, calm decision making and fast learning ability.

LANGUAGES

English | Dzongkha | Hindi | Lhotshamkha | Tshanglakha

PROJECTS

Basic Health Monitoring Station: Final-year project measuring BMI, pulse, SpO₂, respiratory rate, temperature, height and weight with GUI and QR report.

Smart Vehicle Accident Detection System: Designed an embedded alert system using sensors and microcontroller logic to detect accident conditions and support faster emergency response.

HVAC System Automation and Control: Prepared HVAC control concept for temperature control, airflow monitoring, fan/VFD operation, sensors and alarms.

PLC Dam Level Control: PLC-based dam water-level monitoring and control logic with alarm and control-decision functions.

Boiler Monitoring System: SCALA 250 monitoring for boiler temperature, pressure and level loops.

Factory I/O + CODESYS Line: Simulated conveyor sorting, filling, capping, storage and HMI-based bottle-production workflow.

ACHIEVEMENTS AND LEADERSHIP

- IEEE publication: *Design and Development of a Basic Health Monitoring Station*.
- Participated in Student Research Meet organised by Royal University of Bhutan.
- Class Representative for B.E. Year 1 and Year 2.
- Public Address Councilor for college communication and event coordination.
- Winner of college-level Business Idea Competition while representing CST at NATIONAL LEVEL.
- Founder of Zumthruel, a virtual reality gaming venture.
- Active contributor to Entrepreneur Club, GovTech Satellite Program, Vocational Club and Integrity Club.

CERTIFICATIONS AND TRAINING

- BUS401: Management Leadership – Saylor University, 37 hours, Grade: 92.31%.
- Principles of Management – MindLuster Certificate of Achievement.
- Project Management Short Course – Oxford Home Study Centre / Brentwood Open Learning College.
- PLC and HMI from Scratch Specialization – Coursera.
- SCADA Software System Basics; Electric Motor Control Systems.
- Artificial Intelligence for Robotics; AI Industry Analysis.
- Business Productivity for Entrepreneurs; Business Entrepreneurship.
- Hydropower automation and commissioning exposure at Dagachhu Hydropower Plant.

SOFT SKILLS

- Team coordination, supervision support and professional communication.
- Field troubleshooting and practical problem solving.
- Technical documentation, reporting discipline and record keeping.
- Safety awareness, responsibility and calm decision making.
- Fast learning in industrial, facility and service-oriented environments.
